

**ProBariminQT™ Tablets Dissolve Easily
in the Mouth Without Water.**

**Quick-Dissolving Tablets.
Easy to Take Without Water.**

Question: Is there an advantage to taking ProBariminQT™ over an OTC multivitamin?

Answer: ProBariminQT™ was formulated by bariatric surgeons and dietitians to meet the unique dietary requirements and intake restrictions of post-bariatric surgery patients. In prescribing ProBariminQT™, your physician has insured that you are receiving a quality product with the proper formula and best delivery form to meet your nutritional needs, and eliminated the risk that you might purchase an improper formula when choosing from the confusing array of OTC nutritional products.

If you have questions about the choice of ProBariminQT™ versus OTC supplements you should discuss them with your physician or the clinical staff that works with your surgeon.

Question: Where can I get more information on ProBariminQT™?

Answer: Please consult your physician or the clinical staff that works with your surgeon if you are interested in learning more about ProBariminQT™.

for Bariatric Surgery Patients.**

Help maintain your dietary health with ProBariminQT™ tablets.

Question: How do I maintain adequate levels of vital nutrients on my very limited volume intake after surgery?

Answer: Your physician has options for maintaining your dietary health as you adjust to the intake limitations that follow surgery. One very good option is ProBariminQT™, a prescription medical food product specifically formulated for the unique needs and circumstances of post-bariatric surgery patients.

Question: How is ProBariminQT™ prescribed?

Answer: The recommended dose is two tablets per day.

Question: Will ProBariminQT™ reduce the amount of other foods I can eat?

Answer: ProBariminQT™ will not reduce your intake of other foods or liquids because no water is required to ingest the tablets. They dissolve quickly in the mouth without water.

In addition, the tablets may be taken both at once or 1 tablet AM and 1 tablet PM, whichever is most compatible with your intake of other foods.

Question: How does ProBariminQT™ taste?

Answer: ProBariminQT™ has a pleasant and appealing fruit-punch flavor.

Question: My surgeon tells me I cannot ingest sugar because it will cause me to become very sick to my stomach. Is there any sugar in ProBariminQT™?

Answer: Although ProBariminQT™ is sweet to the taste, it is completely *sugar free*.

Question: How does ProBariminQT™ improve daily vitamin and mineral dosing for weight-loss surgery patients?

Answer: ProBariminQT™ provides multiple patient benefits:

- ✓ 19 important nutrients in a single product
- ✓ Easy to take without water
- ✓ Pleasant tasting and sugar free
